

Asaad Mansour

Cairo, Egypt | +201021523344 | asaad.mansourr@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

Summary

Backend software engineer specializing in Java and Node.js, with hands-on experience building REST APIs and GraphQL services, designing relational and document-store databases, and shipping production-ready systems. AWS Certified Cloud Practitioner focused on scalable backend architecture, clean system design, and writing well-tested, maintainable code.

Education

Information Technology Institute (ITI) 9-Month Professional Diploma, Open Source Applications Development Cairo, Egypt | Oct 2025 – Present

University of Northampton & Arab Academy for Science and Technology B.A. Business Informatics (Dual Degree) – GPA: 3.72/4.0 Cairo, Egypt | Sep 2021 – Jun 2025

Experience

Java Software Developer - Intern | Information Technology Institute (ITI) Remote | Jul 2024 – Aug 2024

- Built a multi-module Java application applying SOLID principles, design patterns (Factory, Singleton, Observer), and layered architecture with JUnit/Mockito test coverage

Frontend Developer - Intern | Queen Tech Solutions Cairo, Egypt | Aug 2023 – Sep 2023

- Developed a responsive gym website using JavaScript and Tailwind CSS; refactored 500+ lines of code, reducing load times by 15% and resolving 5+ UI bugs

Business Data Analyst - Intern | 3S Software Cairo, Egypt | Jul 2022 – Aug 2022

- Authored 15+ optimized SQL queries for incident trend reports and designed 3 Power BI dashboards visualizing traffic patterns for data-driven policy decisions

Projects

CrowdFund - Crowdfunding Platform | 2026 Django, Django REST Framework, GraphQL, React, PostgreSQL

- Developed backend API using Django REST Framework with GraphQL query layer, supporting project creation, donation processing, and user authentication workflows
- Designed PostgreSQL schema with normalized relational models for projects, categories, donations, and user profiles; implemented Django ORM queries with select related/prefetch related for optimized data retrieval
- Built role-based access control, input validation, and serialization logic for secure multi-user crowdfunding operations

JPool - Java Connection Pool Library | 2026 Java, PostgreSQL, JDBC, Multithreading

- Engineered a thread-safe connection pool from scratch with configurable min/max connections, idle eviction policies, and automatic health checks via periodic validation queries

- Implemented connection lifecycle management with graceful shutdown, leak detection logging, and bounded wait-time acquisition to prevent thread starvation under load

ChapterOne - E-Commerce Book Store | 2026 Node.js, Express.js, MongoDB, Angular, JWT, CI/CD

- Architected RESTful API with JWT access/refresh token rotation, role-based authorization (admin, seller, buyer), and configurable rate limiting middleware
- Implemented transactional order processing with atomic stock validation, a review/rating system, and Joi schema validation across all endpoints
- Configured GitHub Actions CI/CD pipeline for automated linting and test execution on every push and pull request

Connvia - Event Management Platform | 2025 Node.js, Express.js, React, MySQL, Stripe API, JWT

- Developed multi-role backend APIs (vendors, organizers, attendees) with Stripe payment integration, MySQL connection pooling, rate limiting, and Helmet security headers

Technical Skills

- **Languages:** Java, JavaScript, TypeScript, Python, SQL, HTML/CSS
- **Backend & APIs:** Node.js, Express.js, Django, Django REST Framework, Spring Boot, RESTful APIs, GraphQL
- **Databases:** MongoDB, MySQL, PostgreSQL, SQL Server, Redis
- **DevOps & Tools:** Docker, Git, GitHub Actions, AWS, Postman, Swagger, Linux
- **Security & Testing:** JWT, OAuth 2.0, Helmet, Rate Limiting, JUnit, Mockito, TDD
- **Frontend:** React.js, Angular, Tailwind CSS, Bootstrap
- **Concepts:** Data Structures, Algorithms, OOP, SOLID Principles, Design Patterns, Agile/Scrum

Certifications

- AWS Certified Cloud Practitioner (Feb 2026 – Feb 2029)
